

2<sup>nd</sup> International Workshop on

# ACCELERATOR-DRIVEN SUB-CRITICAL SYSTEMS & THORIUM UTILIZATION

**Experts from around the world will exchange information on topics relevant to accelerator-driven sub-critical systems.**

**The three-day workshop includes five working sessions:**

- a) SRF ingot niobium technology
- b) Accelerator systems and enabling technologies
- c) Fast spectrum and thorium-based systems
- d) Thermal spectrum systems
- e) Comparison to other systems and future directions

**The workshop will seek to identify areas of common interest to explore the possibilities of future collaboration.**
